PROJECTS

BiteGo — Full-Stack Food Ordering Application [bitego-in.vercel.app](#)

Nuxt 3, Vue.js, TypeScript, Pinia, PostgreSQL, Prisma ORM, Supabase, Razorpay

- Built a full-stack food ordering app using Nuxt 3, Vue.js, and TypeScript, with Pinia for cart and global state management.
- Designed a relational PostgreSQL database with Prisma ORM, modeling Users, Stores, Products, Orders, and Reviews.
- Implemented Supabase/JWT authentication with email and SMS OTP, and integrated Razorpay payments end to end.

School Management System — Full-Stack Management Application [schoolmanagementsystem.vercel.app](#)

Nuxt 4, Vue 3, Vue Router, Tailwind CSS, Supabase, PostgreSQL

- Built a school management app using Nuxt 4 and Vue 3, with passwordless Supabase email OTP authentication.
- Developed student, teacher, subject, and attendance modules with grade filtering and teacher-subject mapping.
- Built a Student 360 view with attendance, grades, printable report cards, and an analytics dashboard.

Ecrola Engineering — Modern Corporate Web Application [ecrola-engineering.vercel.app](#)

Next.js 16, React 19, TypeScript, Tailwind CSS, Supabase, PostgreSQL

- Built a corporate website using Next.js App Router and React 19, with Home, About, Gallery, Products, and Admin pages.
- Integrated Supabase/PostgreSQL for dynamic content and contact/appointment submissions, secured with Row Level Security.
- Built reusable components including carousels and appointment forms, animated with Framer Motion and Swiper.
